

RAPID GAIN

EQUINE CONDITIONING FEED

McMillan Rapid Gain is a highly digestible feed formulated for horses requiring muscle development and improved body condition. Contains steam flaked grains for optimum digestibility and high quality protein sources that contain the ideal ratio of essential amino acids. The inclusion of organic yeast culture helps maximise digestibility and ensures a healthy digestive system.

RAPID GAIN DELIVERS:

- Quality protein to assist with muscle development and maintenance
- Highly digestible cold pressed canola oil for optimum conditioning
- Balanced trace minerals and vitamins for optimum health and development
- Organic yeast culture for improved gastrointestinal health

FEEDING GUIDE:

Rapid Gain has been formulated to complement NZ forages and provide the correct balance of all essential nutrients when fed at the following levels daily:

BODY WEIGHT	400kg	500kg	600kg
Spelling	1–3kg	2–4kg	3–5kg
Light Work	2–3kg	3–4kg	4–5kg
Medium Work	3–4kg	4–5kg	5–6kg

The above table is a guide only and the amount fed should be adjusted according to the horse's age, temperament, condition, bodyweight and workload.

When combined with forage, the above indicated amounts of Rapid Gain will provide more than the minimum National Research Council (NRC) requirements for each essential nutrient.

QUALITY GUARANTEED

Our commitment to quality ensures that only the finest ingredients available are included in the McMillan range of equine feeds.

RAPID GAIN

EQUINE CONDITIONING FEED

INGREDIENT:

Steam-Flaked Barley, Steam-Flaked Maize, Steam-Flaked Peas, Beet Pulp Shreds, Flaxseed Flake, Sunflower Seeds, Full Fat Soyabean Meal, Full Fat Canola Meal, Cold Pressed Canola Oil, Molasses, McMillan Balancer Pellets, Salt, Organic Yeast Culture, Vitamin and Mineral Pre-mix.

IMPORTANT INFORMATION:

Always provide access to adequate forage such as pasture, hay and chaff to ensure optimum digestive physiology. At least 1.5% of the horse's body weight in forage should be provided daily.

Ensure no more than 2.5kgs concentrate per 500kg bodyweight is fed per meal.

Always allow free access to fresh, clean water.

Store in a cool, dry place out of direct sunlight.

TYPICAL ANALYSIS (DRY MATTER)

Crude Protein	Fat	Fibre (max)	Salt	Energy (DE)
20%	7%	8%	1.25%	15MJ/kg

TYPICAL ANALYSIS (AS FED)

Crude Protein	Fat	Fibre (max)	Salt	Digestible Energy
18%	6%	7%	1%	13MJ/kg

NUTRIENT COMPOSITION

Nutrient	As Fed (Per kg)
Lysine	8g
Calcium	10g
Phosphorous	5g
Magnesium	3g
Sodium	6g
Chloride	9g
Potassium	12g
Sulfur	2g
Iron	300mg
Zinc	190g
Manganese	140mg
Copper	70mg
Cobalt	0.5mg
Iodine	2mg
Chromium	1.6mg
Selenium	0.9mg
Vitamin A	16,500IU
Vitamin D3	1,650IU
Vitamin E	240IU
Vitamin K	9mg
Thiamine (Vit B1)	10mg
Riboflavin (Vit B2)	17mg
Niacin (Vit B3)	53mg
Pantothenic Acid (Vit B5)	20mg
Pyridoxine (Vit B6)	5mg
Biotin (Vit B7)	0.2mg
Folic Acid (Vit B9)	4mg
Vitamin B12	50ug

NOTE:

- Additional electrolytes may be required under heavy work regimes and/or hot and humid conditions.
- Variations in nutritional values may occur due to natural variability in feed ingredients. Our FeedSafe NZ certified sites have well developed quality systems to minimise any variation from typical levels shown.
- Digestible Energy (DE) value is calculated using an equation and is not an actual measured value and is only a guide for predicting the energy content of the feed.
